Permanent Makeup Post-procedure Care Instructions

Mary McAndrews specializes in the application of Micro Pigment Implantation, otherwise known as Permanent Cosmetics. This is a two step process, and results cannot be determined until the touchup application. To achieve the desired results, your cooperation is required in the following instructions:

EYEBROWS:

Swelling may be slight with a little redness in the immediate area. Ice bag can be applied for the first two hours after the procedure. Do not apply Neosporin ointment.

1. Wear sunscreen SPF30 daily after one week of procedure.
2. Apply Vaseline nightly (forever).
3. Keep products such as Retin A, vitamin C, Glycolics off brows.

Keep area of pigmentation moist 4 times per day with Vaseline, for a minimum of seven days. If a crust appears on the pigmented surface, DO NOT FORCE THE REMOVAL OF CRUST BY PICKING, SCRATCHING, OR WASHING! PIGMENT COULD COME OFF IF YOU FORCE REMOVE!!! You may wash area with mild cleanser and water.

AVOID: Chlorine pool for one week, make-up on the area for 5 days.

EYELINER:

Swelling may be slight. Apply ice packs several times for 15-20 minutes the day of procedure. Then apply ice for 20 minutes next morning.

Moisturize eyes with lubricant eye drop as needed. Don't wear contacts the day of procedure. You may wear contacts the next day if not much swelling is apparent.

AVOID: Chlorine pools for one week. Eyelash curlers for five days, mascara for two days. USE NEW MASCARA TO BEGIN AGAIN. DO NOT RUB EYES! DOING SO MAY CAUSE DAMAGE.

AREOLA RESTORATION:

Swelling may be slight to moderate. Apply ice packs as much as possible after the procedure. Moisturize area often with a thin coat of Bacitracin for 7 days. You may wash the area with mild cleanser and water. Some peeling may occur. DO NOT PEEL OR PICK OFF. Areola has tendency to fade up to 40% after the first procedure.

AVOID: Chlorine pools for one week. Wear Vaseline on area when in a pool or Jacuzzi.
